

FOR IMMEDIATE RELEASE

MicroDental Laboratories Acquires New York's Tetra Dynamics Dental Laboratory

Monday, January 5, 2015, San Francisco—MicroDental Laboratories, a network of dental laboratories committed to helping dentists thrive, announced the acquisition of Tetra Dynamics Dental Laboratory (www.tetradynamics.com). With both laboratories sharing a reputation for world-class service and exceptional quality, this partnership strengthens Tetra's position as one of the leading full-service laboratories in the greater New York Metropolitan area.

"Tetra fits MicroDental's vision of helping dentists create exceptional treatment experiences for every patient," noted Kim Bradshaw, CEO and President of MicroDental Laboratories. "From advanced Cosmetic cases to single unit posterior crowns, from Implant-retained restorations and Partial to Sleep Apnea devices, Tetra is well-positioned to collaborate with dentists and find the solution that best matches their treatment goals."

Based in West Babylon, New York, Tetra Laboratory has serviced dentists for over twenty-five years. Each month hundreds of dentists trust Tetra Laboratory to fabricate a wide range of restorations. Tetra is also one of the leading partners for dentists who utilize digital impression systems.

"Tetra has a legacy of collaborating with dentists who continuously aim to optimize the dental care they deliver to patients," commented Larry Borman, President of Tetra Dynamics Laboratory. "Partnering with MicroDental allows us to build upon this legacy, by enhancing our position on the leading edge of dental materials, technologies and techniques."

About MicroDental Laboratories

MicroDental Laboratories is one of the leading dental laboratories, servicing dental practices in the United States, Canada and other parts of the world. Offering world-class quality and personalized service, MicroDental aims to help dentists create an exceptional and convenient treatment experience for each and every patient. MicroDental is DAMAS accredited, a Certified Dental Laboratory, and features one of the highest ratios of Certified Dental Technicians to cases in the industry. MicroDental offers a full-service portfolio that includes Fixed, Removable and Implant restorations as well as Sleep Apnea treatment devices. MicroDental uses FDA accepted materials, and utilizes the Identalloy/Identceram material verification systems.
